## **DETAILED ACTION**

### ***Election/Restrictions***

Claims 5-6 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 4, applicant should clarify the structure/arrangement of the second enclosure relative to the winding bobbin.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 3-4, as best understood in view of the rejection under 35 USC 112 second paragraph, are rejected under 35 U.S.C. 102(b) as being anticipated by Lin [US 4,519,015].

Lin discloses a transformer assembly [figures 1-2] comprising:

- a bobbin [8, figures 1-2];
- first and second windings wound about the bobbin;
- a core assembly [figures 1-2];
- an enclosure [15] housing the core assembly, the bobbin and the windings;
- a plurality of connectors [9a, 9b] in electrical communication with the windings;
- a cover member [3, 3a] covering the electrical connectors and portion of the windings.;

and

- first and second pins [5, 5a], in removable communication with the plurality of connectors, wherein the first and second pins disposed to project from the enclosure to facilitate connection of the transformer to an electrical outlet.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Lin.

Lin discloses the instant claimed invention except for the specific material for the cover member.

Application/Control Number: 10/058,853  
Art Unit: 2832

The specific material use for the cover member would have been an obvious design consideration based on the intended application(s) and the environment.
